Remarks:

Someone once asked me “how do you do what you do?” I explain to them, or anyone that asks, it’s easy – I have the best coworkers in the world. Truthfully, if I had to do this alone, I probably would have walked away a long time ago. Clearly I believe that we have the best six deputy coroners, who are always ready to step up when needed. Without them, I’d be lost. It goes well beyond that though. The one thing I have learned is this county has the best law enforcement agencies I have ever worked with. They are thorough and professional. Right along side of them is every first responder or fire agency in this county. Without them, scene calls would be difficult. I’ve had to request them to the scene just for man power to help extricate individuals from a residence. Both law enforcement and fire or first responders are always the first to arrive and the last to leave.

I can’t say enough about the various funeral homes we work with. Not just the ones in the county, but all funeral homes. We often work directly with funeral homes not only from all over the state, but also MI and IL. Over time, our main local funeral homes have supplied the van with cots, cot protectors and other various equipment that we didn’t have to purchase.

Finally, it’s the staff of the various Wood County departments that I work with on a routine basis. From Finance, who always listen to me complain, make me laugh or simply have an answer to a question, to the Treasurer’s Office, who are always helpful, cheerful and have a smile on their face every time I conduct business with them.

Lastly, and most importantly, it’s the members of the Public Safety Committee and the overall County Board that continue to support us each day. With a quick email or phone call, they have helped us continue to solve some unique cases.

A huge thank you to everyone mentioned above and to those that I neglected to mention, my sincerest apologies. All of you are the reason that this department is successful and continues to run smoothly. Thank you!

Respectfully Submitted,
David A. Patton

Notes: (The notes below reflect to the categories above in the y-t-d)

#4 – Falls: This amount of eight deaths related to elderly fall victims is unfortunately the most we have ever issued in a month. In review of the cases, three victims sustained severe traumatic head injuries. Four cases resulted in fractures of either a hip or femur, three of which resulted in adult failure to thrive or inanition. One hip fracture unfortunately led to the development of a pulmonary embolism, which is not uncommon with the fracture of a major bone. The last decedent sustained multiple rib fractures on one side of their chest, which caused severe traumatic pleural injuries. After review, all these decedents were elderly and all and some form of underlying comorbidity.

#5 – Covid: This is the first reported Covid related death we have had in several months. This was an elderly Wood County resident who at the time of contracting the Covid virus was being treated for Community Acquired Pneumonia. Being elderly with underlying comorbidities, this “double whammy” of respiratory insult simply couldn’t be overcome.

#8 – Suicide: Sadly, our office has handled one case of suicide in January and now one in February. For March, we are currently at two cases. As I have previously written, I will never be specific as to the method chosen out of respect to the decedent. I can confirm that we have seen this action carried out in a wide variety of means. Unfortunately, we have seen that this category involves individuals from the teenager to the elderly adult. Often there is a history of prior attempts and some type of mental disorder involved.

#10 – Suspected Overdoses: For February, we had three suspected cases of overdoses. All three have since been confirmed as overdoses via toxicology and autopsy. We only autopsied two of these cases. We have now adopted a newer method to allow law enforcement to take a look at the case and see what they can find as opposed to rushing to autopsy the following day. An autopsy does not need to be performed the following day. Due to weekends and holidays or UW scheduling, we often wait for autopsy 3-4 days postmortem. A true help has been

the urine dip sticks we now use for initial testing. While it does not quantify the amount of the substance, they have been very accurate in at least telling us the presence of certain drugs.

#11 – Other: Last month we had three cases that fell into the category of “other” as we don’t have separate regularly listed categories for them. We had two cases of infant deaths reported. Both cases did go to autopsy. With the excellent investigations by the law enforcement agencies involved both of these cases were ruled “accidental due to improper bedding.” The third case involved an individual who sustained a serious injury during an advanced medical procedure that ultimately led to the cause of death.
